The paperwork burden to obtain signed, written consent with designated fax numbers to which faxes may be sent, from ACC's 19,000 U.S. members,

would certainly exceed the FCC's compliance estimate of one hour. Membership application and renewal forms will have to be modified, along with product order forms, website postings, registration forms, and the like. It also is probable that new computer programs would be required to log, track and maintain signed consent forms.

The ACC respectfully requests reinstatement of the "established business relationship" exemption and elimination of the signed, written consent requirement. We look forward to working with the FCC as you review all petitions and filings on this important issue. Thank you for your consideration.

Sincerely,
